

**Earthquakes in Reno, Nevada** (covered in Kerry Theory Newsletter 12, Volume 2) stated: Today is Sunday, April 27, 2008, and transiting Mars, Neptune, and South Node are still within the 2-degree “negative” orb of each other.....by April 30, 2008, Mars begins to leave the complex and the earth should settle back down.

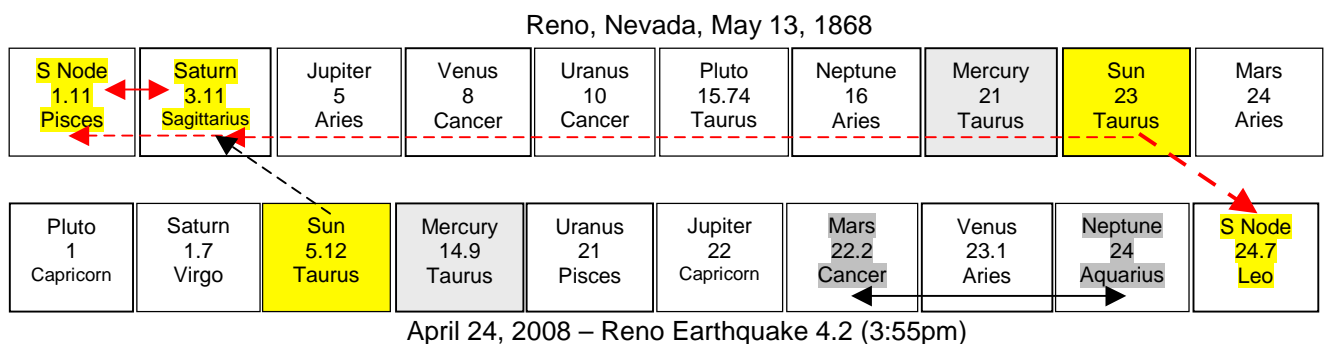

April 30, 2008, the earth begins to settle down.

**Swarm of Earthquakes**....June 8, 2008 - Diane dePolo, a lab seismologist at the seismological laboratory at the University of Nevada, Reno said “it was the strongest sequence of quakes in the past month and signaled a pickup in activity after a recent lull”.

Notice again that as soon as transiting Sun sent energy to the South Node (2-degree orb) it stimulated the natal South Node-Saturn “negative” alignment. Note that transiting Saturn is still within a 2 degree orb of natal South Node and that transiting Mars is again within a 2-degree relationship with Neptune.

Same pattern as April 24, 2008

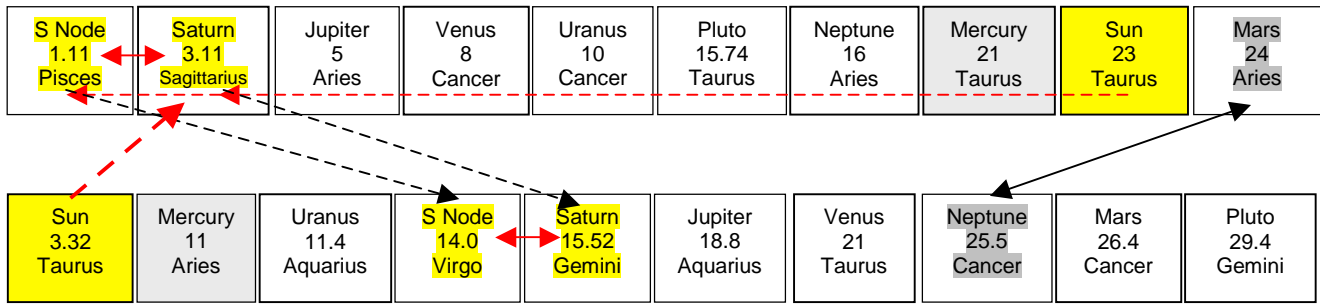

Now go back and look at the placements during these past earthquakes in Reno and see if there is any connection with Neptune and Mars, along with the pattern of a strengthened South Node in the natal chart!

Same pattern on April 24, 1914

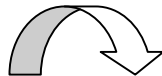

Reno, Nevada, May 13, 1868

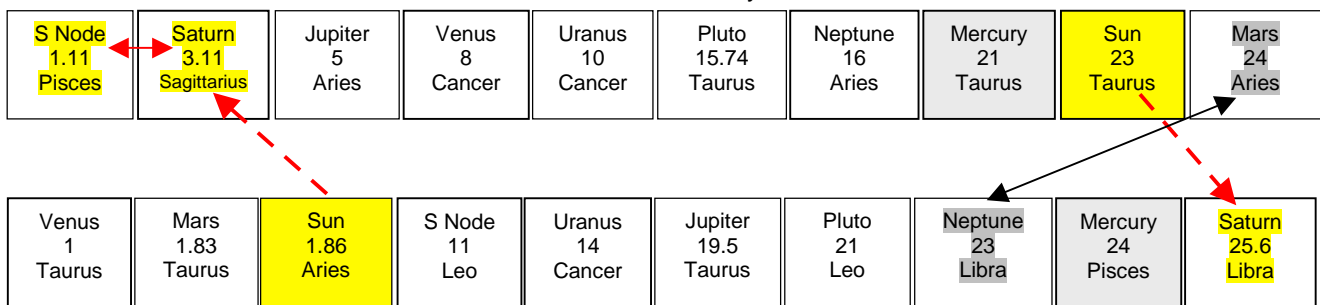

April 24, 1914 – Reno Earthquake 6.1 (12:34am)

And these two are REALLY revealing because you will note that the transiting Sun hit exactly opposite (180 degrees) of where it hit earlier that same year!

Same pattern on March 22, 1953

Reno, Nevada, May 13, 1868

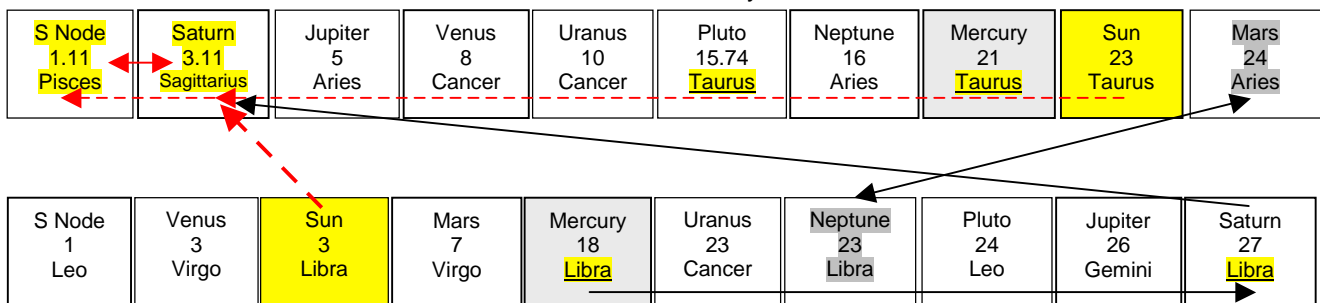

March 22, 1953 – Magnitude 4.3

Same pattern on September 26, 1953

Reno, Nevada, May 13, 1868

September 26, 1953 – Magnitude 5.5
