

It's Time for Some Truth

Carl Sagan, whom I greatly admired, based his argument that Astrology does not work on “the fate of twins”. If they are born at the same location, within minutes of each other, how can their lives be different? His premise was if they have the same chart, then they must have the same outcome. He went on to say that in many cases one twin is killed, “say struck by lightning”, and the other lives to a ripe old age. You do not have to go far to find your answer because in life some of the easiest answers are the simplest ones.

The outcome of all events in life is based on setting, time, place, and opportunity, with the “solar environment” playing a large role in the outcome. For an example, let's take two people born on the same day—they share the same basic chart. Both men have the potential for a remarkable ability in music. One is born to a father whose economic status is above the average and who plays in an orchestra. In fact, he plays several instruments and wishes his son to learn at a young age. The second boy is born to a father that works in the coal mines and has little knowledge or resources to pass on to his son as he is growing. Both charts indicate a time where success will be at hand and our first boy is enrolled in a prestigious school with emphasis on developing his musical talent. Our second boy is enlisted by the government as a soldier to fight a war and is sent to the battleground. Of course, the boy that will succeed is obvious in this example. This is how life works. Throughout life all of us are subject to changes from various forces, some are not our choice or the paths that we would like to follow and they keep us from reaching our potentials. Two twins even if they live in the same environment, unless they are glued together, will have different friends, be exposed to direct circumstances, and perhaps they even have Uranus (the planet of independence and individualism) strong that makes them want to be a separate individual from their twin and so they find hobbies or interests that are different—be different.

Dr. Sagan also emphasized that the readings are so general that they could fit anyone at anytime. Here, I will agree with him. This was one of the reasons, so very long ago, I tried to disprove Astrology. However, a system now has been developed with specific rules which are becoming more and more precise over time. The timing of this is caused by our present level of technology and, of course, the computer giving us the access now to analyze thousands of people instantly. Dr. Sagan also stated that astrologers cannot even agree among themselves, which is certainly true, but astrophysicists disagree in their field of study, too. We need to challenge our beliefs every now and again. We once believed the earth was “flat” and finally people sailed over the horizon in small ships and look what discoveries that led to.

The benefits of understanding the “solar environment” and its relationship with mankind could be the “most important” factor for discovering who we are, where we are going, what is the greatest good for all humankind, and the answers to the puzzling questions of life.

Our choices in life seem simple enough. Either we leave our lives to “fate” or we take control. Either we just sit back and see “what happens” or we open our eyes to what is occurring, the “solar environment included”, and take some action. One thing seems obvious is that we cannot go back in time to restore our mistakes. Even the “lower life forms” like birds, butterflies, ladybugs, etc., know when to migrate to avoid harsh life-threatening winters. But what about man?

Perhaps it is time to fully understand the **Mercury-Sun connection** and how it is affecting us.

Not all of the rules from the “Kerry Theory”, of course, can be printed in this brief message. However, the following pages will give you **exact rules** to follow, so prepare to be amazed. If you read and digest the next 15 pages, when you reach the 15th page, you will of course be able to see quite clearly how “future time” can be clearly ascertained. And if this is possible perhaps there must be something to Astrology that has been overlooked over time.

How do we know for certainty if Hillary Clinton runs for the office of President of the United States that she will be elected?

Hillary was born with Neptune receiving both the natal Sun and Mercury’s “positive” energy (within a 15 degree orb). So we know that both natal and transiting Neptune will be “positive”. We have a simple rule to follow. Each and every time the natal Sun and natal Mercury are “positive” to any natal planet, the “positive” energy flows from the natal planet to the transiting counterpart (in her case, transiting Neptune).

Hillary Clinton, October 26, 1947

Jupiter 0 Sagittarius	Sun 2 Scorpio	Neptune 11 Libra	Mars 14 Leo	Pluto 14.85 Leo	Venus 16 Scorpio	Mercury 21 Scorpio	Saturn 21 Leo	N Node 23 Taurus	Uranus 26 Gemini
-----------------------------	---------------------	------------------------	-------------------	-----------------------	------------------------	--------------------------	---------------------	------------------------	------------------------

Mercury 0 Scorpio	Sun 12 Scorpio	N Node 13 Aquarius	Jupiter 17 Capricorn	Uranus 18 Pisces	Saturn 18 Virgo	Venus 20 Sagittarius	Neptune 21 Aquarius	Mars 22 Scorpio	Pluto 29 Sagittarius
-------------------------	----------------------	--------------------------	----------------------------	------------------------	-----------------------	----------------------------	---------------------------	-----------------------	----------------------------

November 4, 2008 – National Election

Hillary was also born with the natal Sun “positive” to her natal Jupiter, however, natal Mercury is in conjunction with her natal Jupiter, but not in the same zodiac sign, so the potential extra strength is not there. However, a rule tells us that If **ONLY** the natal Sun is “positive” to a natal planet and natal Mercury is not, then you must have transiting Mercury within a 15-degree “positive” orb of the natal planet or the same transiting planet within a 2-degree “positive” orb of the natal Mercury to cause the influence to operate.

Of course on Election Day transiting Mercury is within the allowed 15-degree “positive” orb to natal Jupiter (in fact, it is exact) and thus we highlight both the natal and transiting counterpart (transiting Jupiter).

Hillary Clinton, October 26, 1947

Jupiter 0 Sagittarius	Sun 2 Scorpio	Neptune 11 Libra	Mars 14 Leo	Pluto 14.85 Leo	Venus 16 Scorpio	Mercury 21 Scorpio	Saturn 21 Leo	N Node 23 Taurus	Uranus 26 Gemini
-----------------------------	---------------------	------------------------	-------------------	-----------------------	------------------------	--------------------------	---------------------	------------------------	------------------------

Mercury 0 Scorpio	Sun 12 Scorpio	N Node 13 Aquarius	Jupiter 17 Capricorn	Uranus 18 Pisces	Saturn 18 Virgo	Venus 20 Sagittarius	Neptune 21 Aquarius	Mars 22 Scorpio	Pluto 29 Sagittarius
-------------------------	----------------------	--------------------------	----------------------------	------------------------	-----------------------	----------------------------	---------------------------	-----------------------	----------------------------

November 4, 2008 – National Election

And I've saved the best for last. Hillary was born with Venus in conjunction with her Sun and Mercury in the **same zodiac sign**. That is a "wow". Another rule tells us that whenever any natal planet is in the same zodiac sign as natal Mercury, extra strength is given to this planet, so again we highlight the natal and transiting counterpart.

Hillary Clinton, October 26, 1947

Jupiter 0 Sagittarius	Sun 2 Scorpio	Neptune 11 Libra	Mars 14 Leo	Pluto 14.85 Leo	Venus 16 Scorpio	Mercury 21 Scorpio	Saturn 21 Leo	N Node 23 Taurus	Uranus 26 Gemini
-----------------------------	----------------------------	------------------------	-------------------	-----------------------	-------------------------------	---------------------------------	---------------------	------------------------	------------------------

Mercury 0 Scorpio	Sun 12 Scorpio	N Node 13 Aquarius	Jupiter 17 Capricorn	Uranus 18 Pisces	Saturn 18 Virgo	Venus 20 Sagittarius	Neptune 21 Aquarius	Mars 22 Scorpio	Pluto 29 Sagittarius
-------------------------	----------------------	--------------------------	----------------------------	------------------------	-----------------------	-----------------------------------	---------------------------	-----------------------	----------------------------

November 4, 2008 – National Election

Watch what happens when you draw in all the active angles: Transiting Jupiter is within a 2-degree orb and "positive" by angle to natal Venus. Transiting Venus is within a 2-degree orb and "positive" to transiting Neptune.

Hillary Clinton, October 26, 1947

Jupiter 0 Sagittarius	Sun 2 Scorpio	Neptune 11 Libra	Mars 14 Leo	Pluto 14.85 Leo	Venus 16 Scorpio	Mercury 21 Scorpio	Saturn 21 Leo	N Node 23 Taurus	Uranus 26 Gemini
------------------------------------	----------------------------	-------------------------------	-------------------	-----------------------	-------------------------------	---------------------------------	---------------------	------------------------	------------------------

-------------------------	----------------------	--------------------------	-----------------------------------	------------------------	-----------------------	-----------------------------------	----------------------------------	-----------------------	----------------------------

November 4, 2008 – National Election

Jupiter "positive" Venus is considered one of the best influences. Everything seems to run smooth and uncomplicated, where optimism and generosity thrive. Cooperation and the expansive benefits of Jupiter produce good timing in all of life's events.

Venus "positive" Neptune gives highly developed intuitive faculties, the capability of strong emotional understanding and compassion for others, a deep interest in the environment, and really good timing. It bestows the feeling of "awe" and an "inspiring feeling" that carries an unbelievable quality to the make-up—"Is this really happening?"—and not a dream type influence. It brings pleasure (the very nature of a "positive" Venus) and makes one's environment kick in sensations and feelings that have aesthetic value, a pleasure beyond measure, and it bestows incredible experiences.

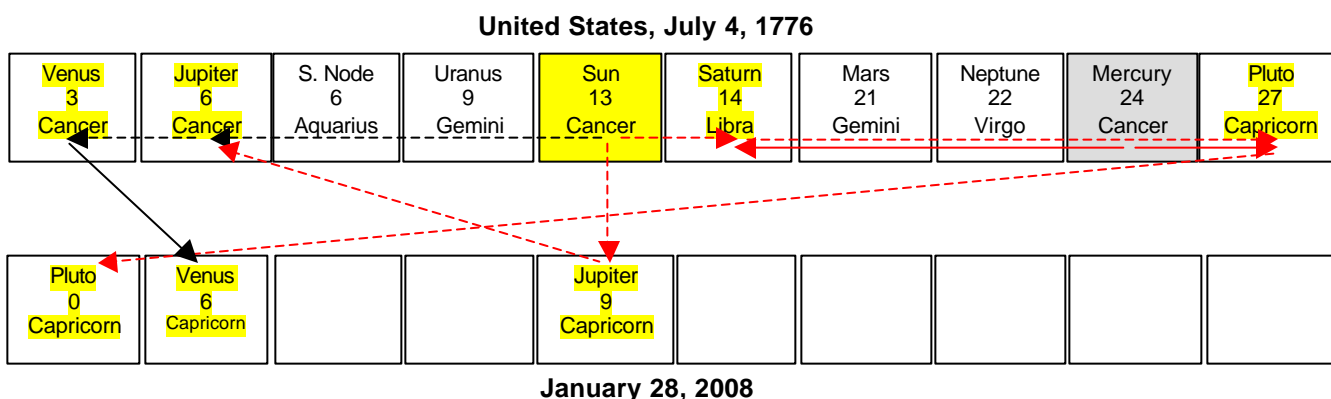

How do I know with certainty that the United States is really in "deep" and dangerous waters, and that economic collapse is on the charts for the next several years, and that our government has let us down miserably?

In the United States' chart we have only Saturn and Pluto "negative" to both the natal Sun and Mercury. The United States has both Jupiter and Venus in conjunction with Mercury (in the **same zodiac sign**), which means that both the natal and transiting Venus and Jupiter are active all of the time—and certainly this is one reason for the huge success over the years for the United States. In a short time transiting Pluto, one of the United States' "negative" planets, will be within the 2-degree "negative" orb of our natal Venus. And on January 28 the President of the United States will lay out his "economic" plan to keep our economy surging ahead.

The President is introducing his plan with transiting Pluto "negative" to the United States' Venus. The influence from Pluto is always severe in nature. It is a slow moving planet and therefore its positioning over any natal planet causes a bigger disturbance. This is the first time that we have experienced its strength since we fought for our independence in 1776.

Pluto "negative" to Venus is a combination that removes the enjoyments of life and causes financial difficulties of a severe nature.

The President does not know that Pluto goes retrograde in 2008 and that it will return to the same "negative" Venus location later in the year. In June 2008 Pluto returns to the zodiac sign of Sagittarius, but then reappears back in Capricorn in November 2008. The President is introducing his plan at a time when transiting Venus is "negative" to the United States' natal Jupiter. This always indicates over generosity or meaningless niceties designed to impress, but which have no real merit or worth.

Americans are about to face a very difficult time with respect to economic factors. It is something that has not been occurring overnight, but which has been building now for some time. There have been indicators along the way which have been ignored by our government. Indicators that could have been plainly seen by all using the "Kerry Theory".

Predictions about coming events are not hard to see using the "Kerry Theory" because we now have a set of rules to follow. For a better understanding, review "A Family's "Fate" – The Kennedys below. You will see that the rules help you to see the outcomes each and every time. How valuable is this?

A FAMILY'S "FATE" - THE KENNEDYS

President John F. Kennedy was born with “negative” energy flowing from his natal **Sun and Mercury** to his natal Uranus (you allow a 15-degree orb). Uranus is the **ONLY** “negative” natal planet in his chart that is receiving “negative” energy from both the Sun and Mercury. Natal Jupiter and Venus are in conjunction with the natal Sun (planets within a 15-degree orb of the Sun) and the remaining planets in his chart are “positive” in relationship to his natal Sun. Therefore, Uranus is the “key” player to all the difficulties in his life.

John F. Kennedy, May 29, 1917

Neptune 2 Leo	Pluto 3 Cancer	Sun 7 Gemini	S Node 11 Cancer	Venus 16 Gemini	Mars 18 Taurus	Mercury 20 Taurus	Jupiter 23 Taurus	Uranus 23 Aquarius	Saturn 27 Cancer
---------------------	----------------------	--------------------	------------------------	-----------------------	----------------------	-------------------------	-------------------------	--------------------------	------------------------

A red dashed line with arrows at both ends connects the Sun (7 Gemini) and Mercury (20 Taurus) boxes to the Uranus (23 Aquarius) box. A red arrow also points from the Uranus box to the right.

The rule is that for any natal planet that is receiving “negative” energy from both the natal Sun and Mercury, the transiting counterpart (here transiting Uranus) becomes active, too. So let’s walk through together each step of the chart for November 22, 1963, the day the President was assassinated with not only the President, but his entire family.

We are looking for the strongest planets in the chart, whether “positive” or “negative”, and the angles of the Sun and Mercury. When we examine President Kennedy’s chart for the day he was assassinated, we see that the slow moving Uranus is just minutes over the 2-degree “negative” orb to his natal Sun (90-degrees). Since we already know that this planet is receiving “negative” energy from the natal Sun, this position becomes very strong. Generally, a 2-degree orb is necessary for any transiting planet in angle to the natal Sun to operate, but this can be widened slightly when you have additional energy from either the natal or transiting Sun. Here we know that Uranus has additional “negative” energy from the natal Sun because it is the **ONLY** natal planet receiving “negative” energy from the natal Sun.

John F. Kennedy, May 29, 1917

Neptune 2 Leo	Pluto 3 Cancer	Sun 7 Gemini	S Node 11 Cancer	Venus 16 Gemini	Mars 18 Taurus	Mercury 20 Taurus	Jupiter 23 Taurus	Uranus 23 Aquarius	Saturn 27 Cancer
---------------------	----------------------	--------------------	------------------------	-----------------------	----------------------	-------------------------	-------------------------	--------------------------	------------------------

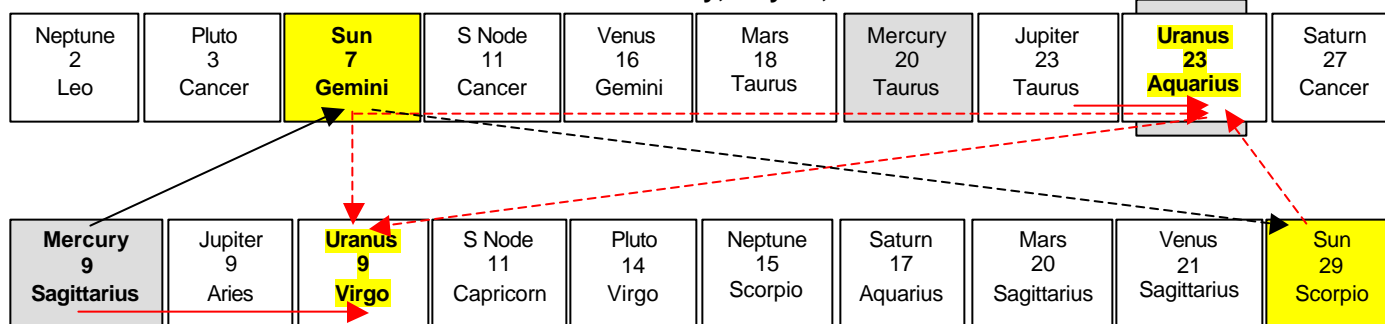

Mercury 9 Sagittarius	Jupiter 9 Aries	Uranus 9 Virgo	S Node 11 Capricorn	Pluto 14 Virgo	Neptune 15 Scorpio	Saturn 17 Aquarius	Mars 20 Sagittarius	Venus 21 Sagittarius	Sun 29 Scorpio
-----------------------------	-----------------------	----------------------	---------------------------	----------------------	--------------------------	--------------------------	---------------------------	----------------------------	----------------------

A red dashed line with arrows at both ends connects the natal Sun (7 Gemini) and Mercury (20 Taurus) boxes to the transiting Uranus (9 Virgo) box. A red arrow also points from the Uranus box to the right.

November 22, 1963

There are a great many ways that Mercury can connect to this energy and make it explosive. The most common way is for transiting Mercury to be within a 2-degree orb of either the natal or transiting planet that we are examining. And of course it must have the same type of energy. In the President’s case transiting Uranus is “negative” to the natal Sun and our connection is made when transiting Mercury reaches the 2-degree “negative” orb of transiting Uranus. Mercury increases the energy—he is the deliverer of the influence.

John F. Kennedy, May 29, 1917

November 22, 1963

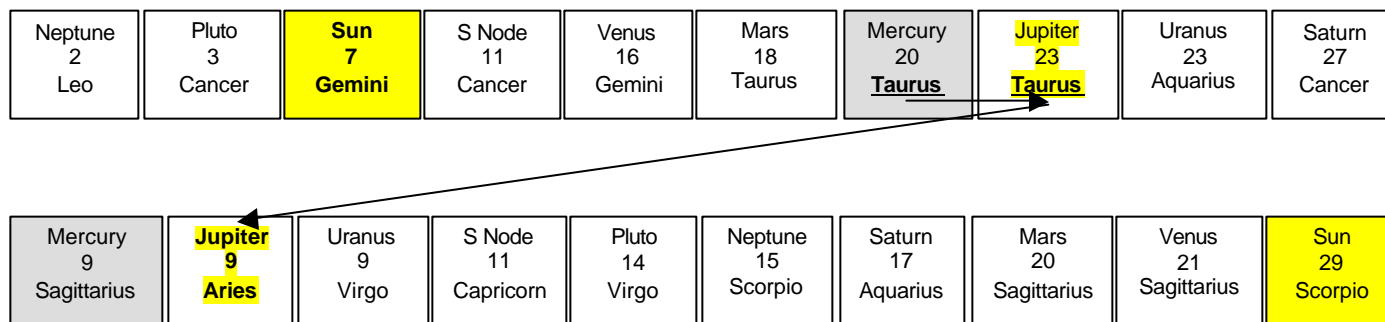

Since you are looking at this chart through my eyes, let me tell you what else I see. Whenever transiting Mercury is within a 2-degree orb of the natal Sun (as we have here), or you can also use the reverse of this, transiting Sun within a 2-degree orb of natal Mercury, the strength or energy of the Sun increases. Notice that President Kennedy also has this happening. In addition, the transiting Sun, which moves a degree a day, has been “negative” to his natal Uranus all week. I believe that when transiting Mercury came within the 2-degree orb of the natal Sun, this increased the Sun’s energy, which flows to the transiting Sun and here spills over to the “negative” angle to the natal Uranus. He has Uranus as “negative” as it gets.

So what is a “negative” Uranus influence? **Uranus** “negative” causes quick, sudden, and unexpected events to occur that have a harmful effect on one’s life.

This is pretty specific and not general to all people—“**a harmful effect**”, a “quick, sudden event”.

President Kennedy’s chart shows natal Mercury is in conjunction with natal Jupiter. **Rule: whenever a planet is in the same zodiac sign as natal Mercury or any other natal planet, then they are active (both natal and transit counterpart).** Here, obviously, transiting and natal Jupiter are ready to connect.

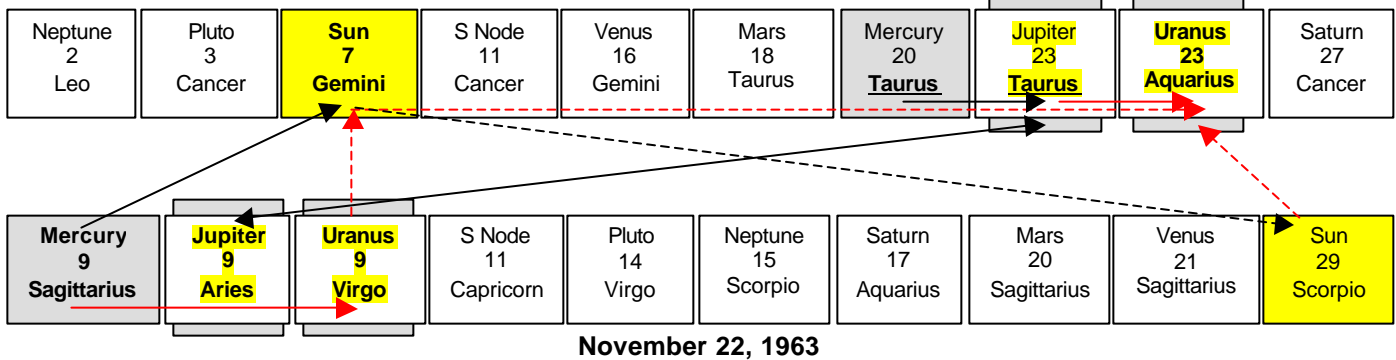

John F. Kennedy, May 29, 1917

November 22, 1963

The trip to Dallas, Texas, was intended to boost his chances for the presidential re-election, as the previous election ticket of Kennedy-Johnson did not win Dallas on the last go around. There were also security concerns because in late October, Adlai Stevenson visited Dallas and had been struck by a protest sign. The President was in a convertible car with no protection afforded for any rifle shot from a distance. He placed himself in the situation, place, opportunity, and setting for his chart to operate—and operate it did in a disastrous way.

John F. Kennedy, May 29, 1917

Jupiter “negative” Uranus gives quick, sudden, and unexpected events that are disastrous because of the expansive quality of Jupiter. Jupiter rules over reasoning or sound judgment and it rules over our aspirations and goals. There is always too little planning or experience to accomplish what you want to succeed. Since a “positive” Jupiter is large gains, then a “negative” Jupiter represents substantial losses.

Why doesn't the “positive” energy chain of transiting Jupiter “positive” to the natal Sun and transiting Mercury “positive” to transiting Jupiter operate?

For the simple reason that transiting Jupiter is within only a 2-degree “negative” orb of transiting Uranus, a “negative” orb with natal South Node and transiting South Node, and natal Jupiter is “negative” to transiting Mars and Venus if we bring them into our energy chain. The “positive” energy from Jupiter cannot flow to any of the other planets. Positive energy cannot mix with “negative” energy. Planets that are in conjunction with or in the same sign as natal Mercury can flow with either a “negative” or “positive” energy chain if they are within a 2-degree orb.

Actually, the natal position of the President's Jupiter helped him accomplish a great deal in his life as Jupiter increases and gives more potency to any combination when placed with planets that have “positive” energy. However, in this case, the flow of Jupiter is “negative” energy and when combined with the “negative” Uranus the results would be catastrophic.

The angle between transiting Jupiter and Uranus tells you how the circuit of energy will flow—it can only flow “negative”. What placed everything into motion was the positioning of transiting Mercury within the 2-degree “negative” orb of natal Uranus.

Call it what you want, “fate”, “destiny”, or just a huge coincidence, but examine the chart of John F. Kennedy's mother on the day of his death.

Let's begin looking at his mother's chart on the day he was assassinated following the same rules.

The rule is that for any natal planet that is receiving “negative” energy from both the natal Sun and Mercury, the transiting counterpart (here transiting Uranus) becomes active.

Rose Kennedy was born with **ONLY two planets** receiving “negative” energy from her natal Sun and they are **Jupiter and Uranus**. Traditional Astrology would say that natal Jupiter in trine to natal Uranus would be beneficial, however, using the “Kerry Theory”, we know that this is not so, as both of these planets are receiving “negative” energy from the natal Sun.

Rose Kennedy, July 22, 1890 (Mother of President John F. Kennedy)

Mars 0 Sagittarius	Saturn 2 Virgo	Neptune 6 Gemini	Pluto 7 Gemini	Venus 7 Virgo	Jupiter 8 Aquarius	Uranus 22 Libra	N Node 23 Gemini	Mercury 29 Cancer	Sun 29 Cancer
--------------------------	----------------------	------------------------	----------------------	---------------------	----------------------------------------	-------------------------------------	------------------------	---------------------------------------	-----------------------------------

Because Uranus and Jupiter are receiving “negative” energy from both the natal Sun and Mercury we know that both of the transiting counterparts have “negative” energy.

Rose Kennedy, July 22, 1890 (Mother of President John F. Kennedy)

Mars 0 Sagittarius	Saturn 2 Virgo	Neptune 6 Gemini	Pluto 7 Gemini	Venus 7 Virgo	Jupiter 8 Aquarius	Uranus 22 Libra	N Node 23 Gemini	Mercury 29 Cancer	Sun 29 Cancer
Mercury 9 Sagittarius	Uranus 9 Virgo	Jupiter 9 Aries	N. Node 11 Cancer	Pluto 14 Virgo	Neptune 15.93 Scorpio	Saturn 17 Aquarius	Mars 20 Sagittarius	Venus 21 Sagittarius	Sun 29.80 Scorpio

November 22, 1963, President John F. Kennedy dies

These two planets are aligned within the 2-degree “negative” orb of each other. We can also see that the transiting Sun is now within a 2-degree orb of natal Mercury, thus increasing the strength of both the transiting and natal Sun. If our “negative” energy chain materializes, we know that the strength of the “negative” Jupiter and Uranus is increased by the positioning of the transiting Sun to the natal Mercury.

Rose Kennedy, July 22, 1890 (Mother of President John F. Kennedy)

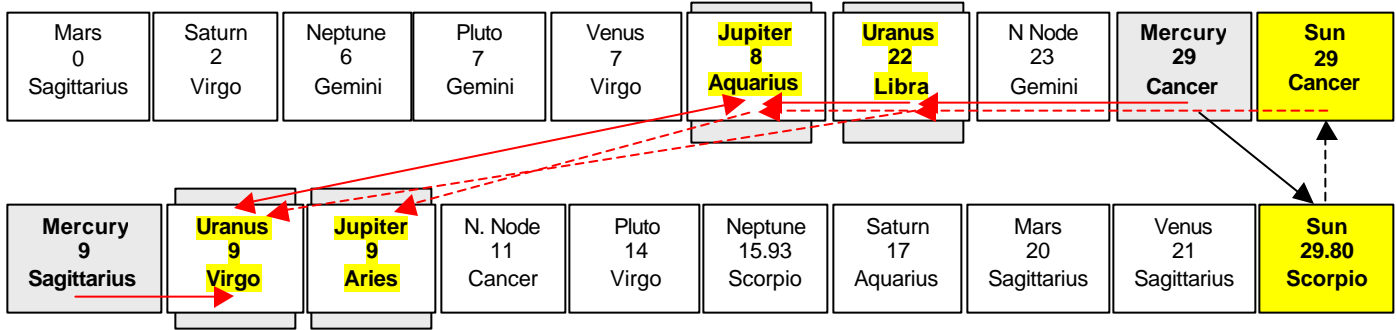

Mars 0 Sagittarius	Saturn 2 Virgo	Neptune 6 Gemini	Pluto 7 Gemini	Venus 7 Virgo	Jupiter 8 Aquarius	Uranus 22 Libra	N Node 23 Gemini	Mercury 29 Cancer	Sun 29 Cancer
Mercury 9 Sagittarius	Uranus 9 Virgo	Jupiter 9 Aries	N. Node 11 Cancer	Pluto 14 Virgo	Neptune 15.93 Scorpio	Saturn 17 Aquarius	Mars 20 Sagittarius	Venus 21 Sagittarius	Sun 29.80 Scorpio

November 22, 1963, President John F. Kennedy dies

On November 22, 1963, transiting Mercury is within a 2-degree “negative” orb of transiting Uranus setting our “negative” energy chain into motion. We therefore know that transiting Jupiter, which receives the “negative” energy from the natal Jupiter (and “negative” is the key word here), is within a 2-degree “negative” orb of transiting Uranus. The strength becomes quite noticeable

when you see that the slow moving transiting Uranus is also positioned within a 2-degree orb of the natal Jupiter.

Rose Kennedy, July 22, 1890, (Mother of President John F. Kennedy)

November 22, 1963, President John F. Kennedy dies

All “negative” natal planets that have “negative” angles from **both the natal Sun and Mercury** always flow to the transiting counterparts. We therefore know with certainty that transiting Mercury “positive” to transiting Jupiter will not operate as the natal Jupiter has “negative” energy from the natal Sun and Mercury.

We have **ONLY** one energy chain operating and that is transiting Uranus “negative” natal Jupiter and transiting Uranus “negative” to transiting Jupiter.

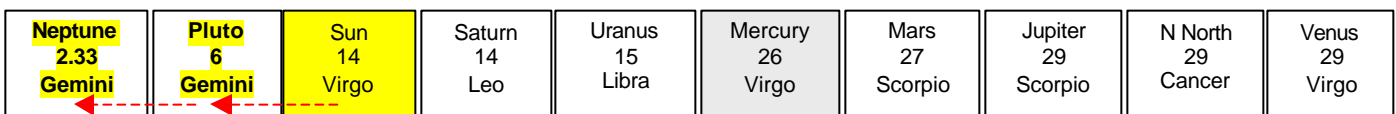

Jupiter “negative” Uranus gives quick, sudden, and unexpected events that are disastrous because of the expansive quality of Jupiter. Uranus “negative” Jupiter brings to mind such words as disastrous, catastrophic, and devastating situations.

Joseph P. Kennedy, the father of President John F. Kennedy, learned of his son’s death the next morning from his son Ted Kennedy, with his Boston physician Russell Bales, Jr. at his side.

The rule is that for any natal planet that is receiving “negative” energy from both the natal Sun and Mercury, the transiting counterpart also becomes active. Here we have a change in the rule, but it always works, too. **When the natal Sun is “negative” to a natal planet, but natal Mercury is not “negative”, then in order to operate and have a possible complete energy chain (because you need both the Sun and Mercury), transiting Mercury must be within a “negative” orb (15-degree) to the natal planet.** It is at these times during the year that the natal Sun tendency can operate.

The **ONLY** two planets in Joseph P. Kennedy’s chart that are receiving “negative” energy from the natal Sun are **Neptune and Pluto**. However, natal Mercury is not “negative” to natal Neptune and Pluto and so in order for these two planets to operate, you **must** have either a “negative” angle from transiting Mercury (15-degree orb) to these natal planets or the transiting counterparts (here, Neptune or Pluto) must be “negative” to natal Mercury (within a 2-degree orb).

Joseph P. Kennedy September 6, 1888, (Father of President John F. Kennedy)

During the time that Joseph Kennedy heard the news of his son's death, the transiting Sun was within a 2-degree "negative" orb to his natal Neptune, which is already receiving "negative" energy from the natal Sun. Since the natal Mercury is not "negative" to natal Neptune, all you need to activate this energy chain is transiting Mercury within a 15-degree "negative" orb of natal Neptune (which occurred).

Joseph P. Kennedy September 6, 1888, (Father of President John F. Kennedy)

Neptune 2.33 Gemini	Pluto 6 Gemini	Sun 14 Virgo	Saturn 14 Leo	Uranus 15 Libra	Mercury 26 Virgo	Mars 27 Scorpio	Jupiter 29 Scorpio	N North 29 Cancer	Venus 29 Virgo
Sun 0.80 Scorpio	Uranus 9 Virgo	Jupiter 9 Aries	Mercury 11 Sagittarius	N. Node 11 Cancer	Pluto 14 Virgo	Neptune 15 Scorpio	Saturn 17 Aquarius	Mars 21 Sagittarius	Venus 22 Sagittarius

November 23, 1963

During this same time we know that the only other natal planet that has "negative" Sun energy is Pluto. We also know that natal Mercury is not "negative" to natal Pluto, so transiting Mercury must be "negative", within a 15-degree orb, to natal Pluto (which occurred). Something else occurred in Joseph P. Kennedy's chart that should catch your attention as it is very significant. Transiting Pluto is in the zodiac sign of Virgo and in conjunction with natal Mercury, therefore, the natal Pluto's "negative" energy is given a huge boost. Even more significant is that transiting Pluto is within a 2-degree orb of a conjunction with the natal Sun, thus boosting the severe "negative" energy to even greater heights.

Joseph P. Kennedy September 6, 1888, (Father of President John F. Kennedy)

Neptune 2.33 Gemini	Pluto 6 Gemini	Sun 14 Virgo	Saturn 14 Leo	Uranus 15 Libra	Mercury 26 Virgo	Mars 27 Scorpio	Jupiter 29 Scorpio	N North 29 Cancer	Venus 29 Virgo
Sun 0.80 Scorpio	Uranus 9 Virgo	Jupiter 9 Aries	Mercury 11 Sagittarius	N. Node 11 Cancer	Pluto 14 Virgo	Neptune 15.96 Scorpio	Saturn 17 Aquarius	Mars 21 Sagittarius	Venus 22 Sagittarius

November 23, 1963

So we have the "negative" energy of both Neptune and Pluto significantly enhanced. Natal Neptune and Pluto are both in the **same zodiac sign** so they connect with one another.

Neptune "negative" Pluto brings on mental stress and there is a tendency for the mind to "shut down" or not accept reality because the sensitivity of Neptune does not accept the harsh realities of the severe Pluto.

I find this more intriguing though. After writing this up I learned the actual birth time of Joseph P. Kennedy was in the morning hours and this places his natal Sun "negative" to his natal Jupiter, however, natal Mercury is not "negative" to natal Jupiter.

So again the same rule applies in that either transiting Mercury must be “negative” to natal Jupiter (which occurred by conjunction), or transiting Jupiter must be within a 2-degree orb of natal Mercury.

Joseph P. Kennedy September 6, 1888, (Father of President John F. Kennedy)

Neptune 2.33 Gemini	Pluto 6 Gemini	Sun 14.28 Virgo	Saturn 14 Leo	Uranus 15 Libra	Mercury 26 Virgo	Mars 27 Scorpio	Jupiter 29.40 Scorpio	N North 29 Cancer	Venus 29 Virgo
---------------------------	----------------------	-----------------------	---------------------	-----------------------	-------------------------------	-----------------------	-----------------------------	-------------------------	----------------------

This means that transiting Jupiter has “negative” energy. Even more significant is that transiting Uranus is now in the zodiac sign of Virgo, the same sign as natal Mercury, meaning that transiting Uranus which is now within the 2-degree “negative” orb of transiting Jupiter would be operational.

Joseph P. Kennedy September 6, 1888, (Father of President John F. Kennedy)

Neptune 2.33 Gemini	Pluto 6 Gemini	Sun 14 Virgo	Saturn 14 Leo	Uranus 15 Libra	Mercury 26 Virgo	Mars 27 Scorpio	Jupiter 29 Scorpio	N North 29 Cancer	Venus 29 Virgo
---------------------------	----------------------	--------------------	---------------------	-----------------------	-------------------------------	-----------------------	--------------------------	-------------------------	----------------------

Sun 0.80 Scorpio	Uranus 9.83 Virgo	Jupiter 9 Aries	Mercury 11 Sagittarius	N. Node 11 Cancer	Pluto 14 Virgo	Neptune 15.96 Scorpio	Saturn 17 Aquarius	Mars 21 Sagittarius	Venus 22 Sagittarius
------------------------	--------------------------------	-----------------------	------------------------------	-------------------------	----------------------	-----------------------------	--------------------------	---------------------------	----------------------------

November 23, 1963

Jupiter “negative” Uranus gives quick, sudden, and unexpected events that are disastrous because of the expansive quality of Jupiter. Uranus “negative” Jupiter brings to mind such words as disastrous, catastrophic, and devastating situations.

It is also interesting to note that Joseph P. Kennedy endured the death of two sons by assassination during the time transiting Pluto moved through the zodiac sign of Virgo. On November 19, 1969, with transiting **Pluto** at 26 degrees of Virgo, or **the same degree as his natal Mercury**, he died.

Notice that like John F. Kennedy who had his Jupiter and Mercury in the same zodiac sign of Taurus thus giving John more authority and advantages in life, Joseph P. Kennedy has his Venus and Mercury in Virgo. A prominent Venus tends to make life very beneficial as it is “fruitful” and it brings on satisfying affairs in life, money, and relationships that are beneficial. On this day in time, however, his transiting Venus is obscure and not connected with anything.

Continuing on, we again use our first rule that **for any natal planet that is receiving “negative” energy from both the natal Sun and Mercury, then its transiting counterpart becomes “negative”**.

Jacqueline Kennedy’s chart (the President’s wife) on the day of his death shows an energy chain that is quite clear. Jacqueline Kennedy was born with natal Saturn (and perhaps her natal North Node as well) receiving “negative” energy from both her natal Sun and Mercury.

Jacqueline Kennedy Onassis, July 28, 1929

Neptune 0 Virgo	Mercury 2 Leo	Sun 5 Leo	Jupiter 9 Gemini	Uranus 11 Aries	Mars 14 Virgo	N Node 17.77 Taurus	Pluto 18 Cancer	Venus 21 Gemini	Saturn 24 Sagittarius
-----------------------	---------------------	--------------------------	------------------------	-----------------------	---------------------	------------------------------------	-----------------------	-----------------------	--------------------------------------

Saturn is receiving “negative” energy from the natal Sun and Mercury, so the transiting counterpart is also “negative”. The natal Sun is “negative” to the natal North Node, however, natal Mercury is in question because it is so close to the 15-degree orb boundary. However, here transiting Mercury is within a 2-degree “negative” orb of transiting North Node, so it does not matter. The energy chains become one—transiting Saturn is within a 2-degree “negative” orb to the North Node/South Node. Again, it was the placement of transiting Mercury aligned within a 2-degree “negative” orb of transiting North Node that brought this energy chain to fruition.

Saturn “negative” causes sorrow, misfortune, poor health, stress, and frustration and tends to make one’s expression cold and callous.

Jacqueline Kennedy Onassis, July 28, 1929

Neptune 0 Virgo	Mercury 2 Leo	Sun 5 Leo	Jupiter 9 Gemini	Uranus 11 Aries	Mars 14 Virgo	N Node 17.77 Taurus	Pluto 18 Cancer	Venus 21 Gemini	Saturn 24 Sagittarius
-----------------------	---------------------	--------------------------	------------------------	-----------------------	---------------------	------------------------------------	-----------------------	-----------------------	--------------------------------------

Mercury 9 Sagittarius	Uranus 9 Virgo	Jupiter 9 Aries	N. Node 11 Cancer	Pluto 14 Virgo	Neptune 15 Scorpio	Saturn 17 Aquarius	Mars 20 Sagittarius	Venus 21 Sagittarius	Sun 29.80 Scorpio
--------------------------------------	----------------------	-----------------------	----------------------------------	----------------------	--------------------------	-----------------------------------	---------------------------	----------------------------	----------------------------------

November 22, 1963, President John F. Kennedy dies

Rule: an active energy chain (here, transiting North Node) that is within a 2-degree orb of any natal or transiting planet(s) which is in conjunction with (same zodiac sign and within a 2-degree orb) a “negative” energized planet will activate them. In our example below the angle from the North or South Node would have to be “negative” because our energy chain is “negative”. Notice that we see exactly the same “negative” **Jupiter and Uranus** alignment now receiving the “negative” energy from the North Node/South Node.

Jacqueline Kennedy Onassis, July 28, 1929

Neptune 0 Virgo	Mercury 2 Leo	Sun 5 Leo	Jupiter 9 Gemini	Uranus 11 Aries	Mars 14 Virgo	N Node 17 Taurus	Pluto 18 Cancer	Venus 21 Gemini	Saturn 24 Sagittarius
-----------------------	---------------------	--------------------------	------------------------	--------------------------------	---------------------	---------------------------------	-----------------------	-----------------------	-----------------------------

Mercury 9 Sagittarius	Uranus 9 Virgo	Jupiter 9 Aries	N. Node 11 Cancer	Pluto 14 Virgo	Neptune 15 Scorpio	Saturn 17 Aquarius	Mars 20 Sagittarius	Venus 21 Sagittarius	Sun 29.80 Scorpio
-----------------------------	----------------------	--------------------------------	----------------------------------	----------------------	--------------------------	--------------------------	---------------------------	----------------------------	----------------------------------

November 22, 1963 President John F. Kennedy dies

Jupiter “negative” Uranus gives quick, sudden, and unexpected events that are disastrous because of the expansive quality of Jupiter. Uranus “negative” Jupiter brings to mind such words as disastrous, catastrophic, and devastating situations.

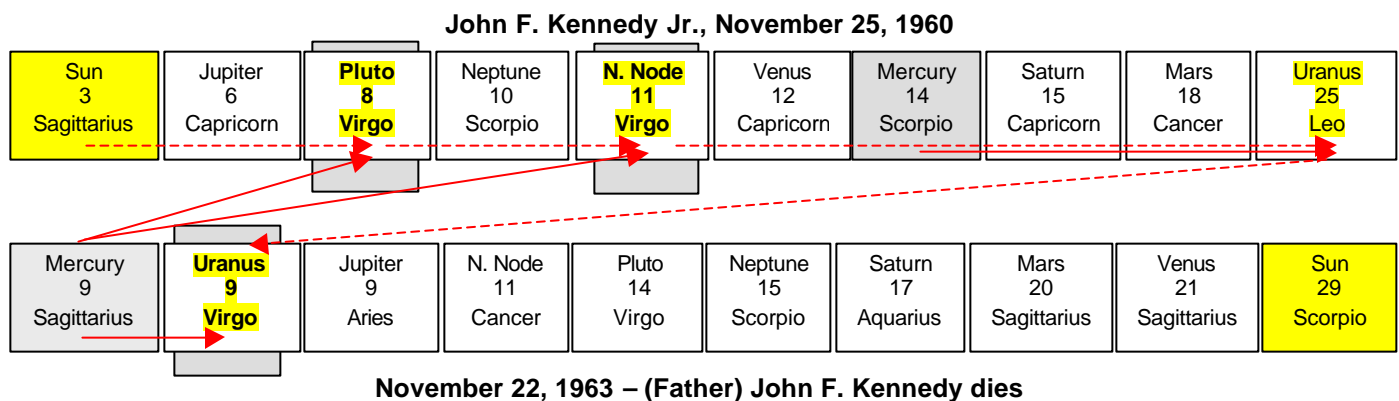

Continuing on, we again use our first rule that **for any natal planet that is receiving “negative” energy from both the natal Sun and Mercury, then its transiting counterpart becomes “negative”**.

John F. Kennedy, Jr. was only 3 years old when his father was assassinated and his chart clearly shows the loss of his father.

John F. Kennedy, Jr.’s natal Sun and Mercury are “negative” to natal Uranus (this is the **ONLY** planet in his chart receiving “negative” energy from both Mercury and the Sun). In his chart, natal Pluto and the North Node are receiving “negative” energy from the Sun, but Mercury is not “negative”. The remaining planets have “positive” energy from the natal Sun.

Since natal Uranus has both natal Mercury and the Sun “negative”, this energy travels to the transiting counterpart (transiting Uranus). Transiting Mercury is within a 2-degree “negative” orb of transiting Uranus, thus increasing the “negative” Uranus strength and activating this complex.

Transiting Mercury is now “negative” to natal Pluto and the North Node. Transiting Uranus is “negative” and within the 2-degree orb of natal Pluto and the North Node.

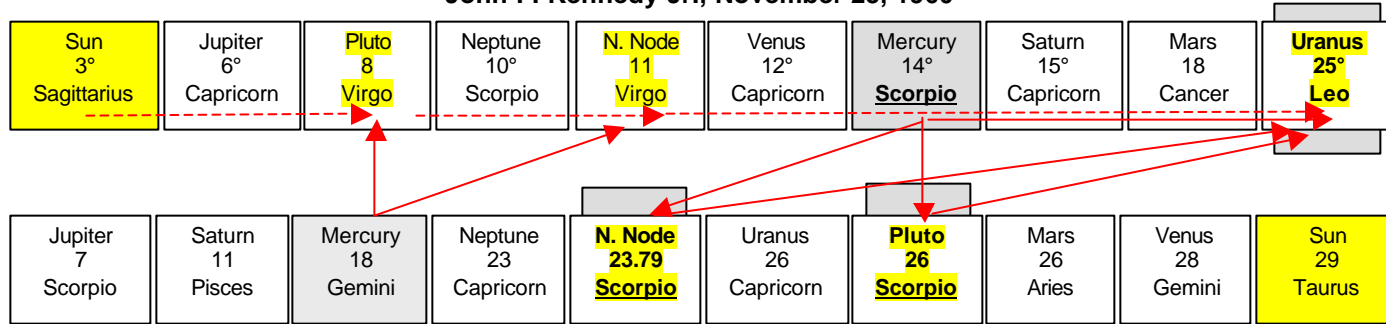

Uranus “negative” Pluto/North Node brings about sudden and unexpected “forced” changes in one’s life.

There is no mistaking that these patterns work like clock-work, so let’s look at John F. Kennedy, Jr.’s chart when his mother died, to see the comparison—and then back to our analysis.

John F. Kennedy’s **ONLY** natal planet that has both the natal Sun and Mercury sending “negative” energy is Uranus. Natal Sun is also sending “negative” energy to natal Pluto and the North Node. The rule tells us that if transiting Mercury is “negative” to natal Pluto and the North Node (15-degree orb), then the energy chain is complete and can be energized. Transiting North Node and Pluto are “negative” to the natal Uranus **and thus you have the same pattern.**

Notice too that transiting North Node and Pluto are in Scorpio and in conjunction with natal Mercury in Scorpio, which makes the natal and transiting counterparts gain more strength.

John F. Kennedy Jr., November 25, 1960

May 19, 1994 – (Mother) Jackie Onassis Kennedy dies 10:15pm

North Node and Pluto “negative” Uranus bring about quick, sudden, and unexpected “forced” changes in one’s life.

It is also interesting to note that on July 16, 1999, when **transiting South Node** was 13 degrees of Leo **or within the 2-degree orb of natal Mercury**, John F. Kennedy, Jr. died.

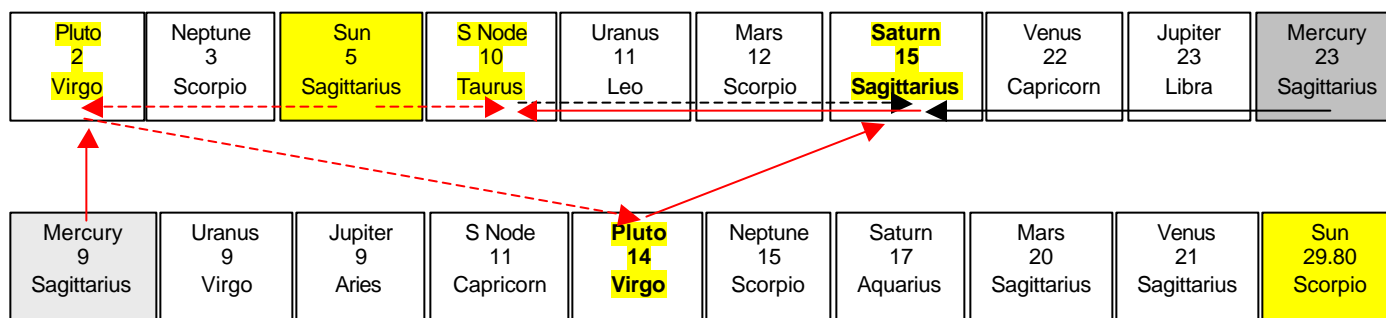

Continuing on, we again use our first rule that **for any natal planet that is receiving “negative” energy from both the natal Sun and Mercury, then its transiting counterpart becomes “negative”**.

Caroline B. Kennedy was 6 years old when her father was assassinated. You often wonder how much children feel a loss or if they actually understand what the loss really means.

Caroline was born with ONLY the South Node receiving “negative” energy from both the natal Sun and Mercury. Natal Pluto is the ONLY other planet receiving just the “negative” energy from the natal Sun—the remaining planets are receiving “positive” energy from the natal Sun, except Saturn, which is conjunct the natal Sun.

So once again, if natal Pluto is to become “negative”, it must have transiting Mercury in “negative” alignment to natal Pluto (15-degree orb) or transiting Pluto must be within the “negative” 2-degree orb of natal Mercury. The “negative” transiting Pluto is within the 2-degree “negative” orb of natal Saturn. Natal Saturn is the ONLY planet in conjunction with natal Mercury and therefore the “negative” connection between transiting Pluto and natal Saturn is made.

Caroline B. Kennedy, 11-27-1957, (daughter of President John F. Kennedy)

November 22, 1963, (Father) President John F. Kennedy dies

Pluto “negative” Saturn brings about a complete loss of some kind into one’s life plus sadness and sorrow over life’s circumstances or situations.

When using the simple rules presented you can read charts of people with incredible accuracy. You can do this in the **past, present, or future time**.

It takes study, effort, and time to understand how the “Kerry Theory” works, and with time and extensive research, you will see just how well this new theory works. These Newsletters are not intended to be a complete detailed volume containing all of the discoveries made so far. These Newsletters are an introduction and summary to the basic research findings. You are free to experiment with the data presented in these Newsletters; however, you may not be using the most up-to-date information. Addendum:

John F. Kennedy died on November 22, 1963 because of the Uranus-Jupiter “negative” alignment, both natal and transiting. Did you know he had this once before in his life? Yep, on August 1, 1943, transiting Uranus was 8 degrees of Gemini - natal Sun is 7 degrees of Gemini (same sign of the zodiac very strong). Transiting Mercury on August 1, 1943 is 22 degrees of Leo or EXACTLY 1 degree in opposition to his natal Uranus giving us the exact same “negative” energy chain. This means that natal Jupiter would kick in because of its placement with natal Mercury, both in the same sign of Taurus. Uranus “negative” Jupiter - I give you PT109 sinking (August 1, 1943). He survived because the “positive” natal Saturn (Sun and Mercury both “positive”) turns on the transiting Saturn which just happens to be within a degree of a “positive” alignment to his natal Jupiter.

Now is this just pure coincidence?!?!?!?!

NO WAY!!
